## Nottingham Country Garden Club

Newsletter April, 2012

NCGC Meeting /April 5, 2012 9:30 MUD Bldg. #81

**Program:** "Cooking With Herbs" followed by a question and answer session.

Presenter: Jennie Dunnihoo

## **A Word From Our President**

Happy Spring and Happy Easter!
I can't wait for the interesting and passionate speaker, "Jenny", to share with us a bit of her immense knowledge on herbs at our April meeting. If you have a favorite herb recipe or food, I hope you will share it with us at this meeting. Using the fruit of our garden labors, "It's a good thing!". Sharing - even better! Oh, I am so excited...see you soon!
Sue

April Extra Activity

Date: Tuesday, April 17th

Time: 10:00 am.

Activity: We'll be visiting the beautiful gardens of our own NCGC member Mary Lou Proctor where she will speak to us on companion plants for a border.

Extra activities are for members and their guests only.

**Looking Ahead** The May NCGC meeting will be our end-of-the-year luncheon to be held at Brookwood Community which will include a tour of Brookwood and of course, shopping! Reservations and payment of \$22.00 are required by April 19th, so bring your money or checkbook to our April meeting. A menu choice signup sheet will be available at the April meeting also. If you are unable to attend the April meeting, please contact Marilyn Frueh before the 19th.

## **Events and Workshops**

### **Monarch Report**

Brenda Beuce Smith, aka "The Lazy Gardener" received a post to her blog from a reader who noted an unusually high number of monarch caterpillars in her yard this year. The reader and Brenda Beuce Smith would like to know if any other gardeners out there have noticed this as well. You can post your observations to http://blog.chron.com/lazygardener.

Monarch Caterpillar

# Monthly Gardening 'l'asks - April

Sources: Fort Bend Master Gardeners;

Dr. Doug Welsh, professor and horticulturist, Texas A&M University, Texts Gorden A/tntnoc Fort Bend County Master Gardeners, Inc. website (v.ww.fbmg.com), "Texas Gardener Magazine", ChrisS. Corby Editor.

#### \*Perennials & Annuals

Time to start removing dead blossoms from annual, perennials, and roses to keep them blooming. Plants will have fewer blooms if the blossoms are allowed to develop seeds. Begin a monthly fertilization program using nitrogen fertilizer for all annuals and perennials. For summer color, plant ageratum, angelonia, begonias, black-eyed Susans, cleome, coleus, coneflowers, cosmos, croton, geraniums, hibiscus, impatiens, lantana, marigolds, melampodium, melochia, pentas, periwinkles, Persian shield, pincushion flower (scabiosa), sunflowers, verbena, and zinnias. Plant caladiums in late April to early May when soil temperatures warm to 10 degrees F. This is a good month to plant agapanthus, amaryllis, calla lilies, cannas, crinums, daylilies, African and butterfly irises, gingers, and rainlilies. Allow narcissus foliage to die back naturally. Get a good layer (at least 3 Inches) of mulch down in flower beds before the summer heat sets in. This will conserve water, and help prevent weeds.

## \*Vegetables & Herbs:

Before planting spring vegetables, prepare your beds with organic matter. The following vegetables can be planted in April from seed: beans (bush and pole, plant in early April and again in mid-April for continuous harvest), cantaloupe, cucumber, corn, summer squash, okra, Southern peas, pumpkins, and watermelons. Plant eggplant and peppers from transplants.. Warm-season herbs such as basil, mint, chives, lemon grass, lemon verbena, Mexican mint, oregano, rosemary, and thyme can be planted now. Fertilize with a complete fertilizer, such as 15-5-10. Make this fertilizer application prior to each garden season, spring and fall. Mulch the vegetable garden to preserve soil moisture from spring rains and to reduce disease-causing fungi splashing from the soil to the plants.

#### \*Trees and Shrubs:

Prune spring-blooming trees and shrubs after blooming and only if needed. Fertilize azaleas and camellias after blooming.

#### \*Roses

Roses prefer at least six hours of sun a day. Hybrid teas require application of fungicide each week to prevent black spot. (Note: Earth Kind roses are more resistant to mildew and black spot than the hybrid tea roses). Encourage lady beetles in all their larval stages and also adults as aphid predators. Fertilize existing rose bushes but not newly planted ones. Apply 2-3" of mulch.

A Reminder from Horticulture
Do you have some lovely flowers
blooming in your yard, or an unusual
plant? Bring in a sample or cutting and
share it with the club. Do you have
something growing in your yard and have
no idea what it is? Bring a sample in and
we'll try to solve the mystery. Please
remember to complete the horticulture
form found in the October newsletter
